    o CSCI 0220: Discrete Structures and Algorithms

P R O J E C T S

IOS – "The Number"
  + iOS App for a delivery startup on campus. The app finds the optimal route to several input destinations and calculates the cost of operation and profit based on the route and the surge of the day. The app then sends appropriate text messages to customers and deliverers.

SCHOOL
  + Various projects in Java and OCaml, covering areas in graphics, AI, game simulation, and natural language processing.
